

Summary

Dedicated Medical Laboratory Technician with experience in specimen processing, testing and analysis. Proven ability to accurately perform laboratory tests, analyze results and report findings. Skilled in working with a wide range of laboratory equipment and instrumentation. Committed to delivering accurate and timely results to ensure patient safety and satisfaction. Proven ability to function effectively in a fast-paced environment and maintain quality standards.

Skills

- Blood and Tissue Sample Collection
- Diagnostic Tests
- Molecular Diagnostics
- Microbiology Techniques
- Phlebotomy
- Automated Laboratory Testing
- Laboratory safety protocols
- Hematology Analysis
- Serology Testing
- Aseptic Techniques
- Teamwork Abilities
- Critical Thinking
- Interpersonal & Communication Skills
- Adaptability and Flexibility
- Multitasking Abilities
- Self Motivation & Analytical Skills
- Time management abilities

Education

Master of Science: Biotechnology
International Islamic University Islamabad,
Pakistan – 2021

Bachelor of Science: Biotechnology
International Islamic University Islamabad,
Pakistan – 2018

Work history

Medical Laboratory Technician – 03/2023 to 02/2024

Biopath Clinical Labs | Islamabad, Pakistan

- Conducted routine chemical, microscopic and bacteriological analyses on blood, tissue and body fluids samples.
- Conducted chemical analyses of body fluids to detect abnormalities or disease.
- Identified abnormal test results to refer to pathology for further review.
- Operated medical equipment to collect samples and perform simple diagnostic tests for patients.
- Demonstrated proper infection control procedures by safely disposing of sharps and hazardous wastes.
- Set up, cleaned and tested sterility of medical laboratory equipment.
- Analyzed data from laboratory instruments accurately and efficiently.
- Proficiently managed time while working independently or collaboratively with others in a fast-paced environment.
- Reported results of test and related test data by entering information in computer database.
- Maintained records of all laboratory activities including inventory control logs, quality assurance programs and proficiency testing records.
