## JOB DESCRIPTION

- Completing the patients' histories, preparing and educating patients about the imaging procedure.
- Positioning patients and equipment to capture the correct area and produce clear images.
- Monitoring patients and ensuring their safety during imaging procedures.
- Logging and organizing image results, developing film, assisting with the interpretation of the radiograph results, and consulting with Radiologists to determine if other images need to be taken.
- Ensuring the proper sterilization and storage of the equipment, maintaining radiographic equipment, and reporting any equipment failures.
- Coordinating with the radiology department to schedule and complete radiographic procedures.
- Maintaining up to date knowledge of current radiology practices.
- Ensures operation of radiology equipment by completing preventive maintenance requirements, following manufacturer's instructions, troubleshooting malfunctions, calling for repairs, maintaining equipment inventories, and evaluating new equipment and techniques.
- Maintains professional and technical knowledge by attending educational workshops, reviewing professional publications and participating in professional societies.
- Protects patients and employees by adhering to infection-control policies and protocols; following drug protocols in case of reactions to drugs, such as contrast media.
- Contributes to team effort by accomplishing related results as needed.
