Communication Skills | Leadership Qualities | Interpersonal skills | Speaker and Orator | Teaching English language | Sportsman | Husn-e-Qirat reciter | IT Skills - MS word and MS Excel

Experience (~ 6 years of clinical experience):

UAE Experience:

September 2023-januray 2025 MEDICAL PRACTITIONER at we-care medical center, LLC, Abu Dhabi, UAE

As a Medical Practitioner at We-Care Medical Center, I provided high-quality care across a broad spectrum of acute and chronic conditions, diagnosing, treating, and managing patients of all ages. I conducted thorough medical assessments, developed personalized treatment plans, and performed minor clinical procedures. Additionally, I collaborated closely with multidisciplinary teams, including specialists, nurses, and administrative staff, to ensure seamless patient care and improve

operational efficiency. I played an integral role in patient education, counseling on disease prevention and management of chronic conditions, while also providing emotional support in complex and critical cases. Throughout my tenure, I maintained accurate patient records, adhered to medical regulations, and contributed to ongoing professional development through continuous medical education. My commitment to patient-centered care and quality improvement initiatives led to improved patient outcomes, high satisfaction rates, and successful team collaborations in managing complex cases.

January 2021 – July 2023 • MEDICAL PRACTITIONER at Northwest General Hospital and Research Centre, Peshawar, Pakistan.

I worked at the **SURGICAL ICU** of this state-of-the-art **ISO 9001 and UKAS Certified** tertiary care hospital which provides premium Healthcare services to the people of Pakistan and Afghanistan. Under the supervision of two highly qualified consultants. currently, I am being trained, and I am learning various protocols of the ICU care and several critical care procedures such as CVP lines, arterializes ABGs and BP monitoring, applying CPAP an anaesthetizing and sedating patients, Endotracheal intubation and its care, tracheostomy and its care, lumbar puncture and operating bedside Monitors and Ventilators on different modes. Being in the medical ICU, I'm a part of the Team **CODE BLUE** and actively respond to cardiac arrests and other medical emergencies inside the hospital premises and participate in their resuscitations. I perform ultrasound guided pleural tap and ascitic tap under supervision as well as lumbar puncture for CSF collection. I am able to intubate (**under supervision**) and provide post intubation management, pass CVP lines and post CVP management, put patients on BIPAP, CPAP, Ventilator, prescribe necessary medication (**under supervision**) to patients in the ICU Care and order important and relevant investigations. I prepare bed cases and present them to the consultants in morning round sand make sure their management plans are implemented. I do all the necessary documentation related to patients on the HMIS on daily basis including daily consultant notes, daily progress notes, family counseling, and other important events.

June 2020 – January 2021 • at karak medical complex karak kpk, Pakistan

I Joined this institute as **MEDICAL PRACTITIONER** where I regularly rotated between medical OPD and Emergency department. I attended morning and evening rounds with a consultant in in-patient department. Managed common Medical, Pediatric, Ophthalmic, ENT and Surgical Emergencies and common complaints of General Practice **under supervision**. Evaluated labs, ultrasound, ECG. Collaborated with colleagues on admissions, discharges and referrals.

I managed cases of General Practice as well as common Emergencies **under supervision**. In addition, I worked as a **DIRECTOR HYGIENE** and Health safety advisor for field workers. Exercised HSE related duties on priority basis. Regularly **delivered lectures on First Aid management** of a variety of emergency cases. Worked with laborers and staff on **mental stress control measures**. In addition, **delivered lectures on MENTAL STRESS, hygiene and heat stress and heat stroke**. Fully vaccinated the entire crew in **covid-19 pandemic**. Maintained covid-19 related register. Maintained medicine and medical equipment inventor
