- Using outlook for email, calendar and to track tasks.
- Ability to manage a busy schedule, priorities tasks, and delegate responsibilities as needed.
- Commitment to lifelong learning and professional development and staying up to date with emerging trends in clinical practice and public health.

Research Experiences

Research project titled **“Awareness and Information on Undescended Testes Diagnosis and Age at Corrective Surgery”**

Conducted under supervision of Dr Francisco Schneuer at The University of Sydney. The goal of the study was to provide evidence-based recommendations about factors that may cause delays in corrective surgery for boys with undescended testes, which could inform future policy in this area.

My role involved:

- Conducting a thorough search of relevant studies, government reports and statistics in database such as Medline, Scopus, and Grey Literature.
- Creating and editing various study documents, such as patient information sheet and online survey via Redcap.
- Developing abstracts and a conference presentation based on the research findings.
- Reading and comprehending the ethics approval for the study.
