

Dr. SHERUN KANDIAN

Specialist Pedodontist with DHA

+ 9 7 1 5 6 6 2 6 9 8 5 8

CAREER OBJECTIVE

Dedicated and compassionate specialist pediatric dentist with DHA, possessing extensive experience in pediatric and preventive dentistry across Saudi Arabia, and India. Passionate about creating positive dental experiences for children, specializing in behavior management, full mouth rehabilitation under general anesthesia, interceptive orthodontics, and pain-free treatments. Proficient in utilizing digital dentistry tools, advanced restorative procedures, and nitrous oxide sedation to ensure a stress-free environment for young patients. Committed to educating parents and children on preventive oral care while delivering high-quality, aesthetic, and functional dental solutions. Seeking an opportunity to contribute expertise in pediatric dentistry within a dynamic, patient-centered practice.

EXPERIENCE

SPECIALIST PEDIATRIC DENTIST | 2023 - 2024

Bluedeem medical centre, Buraidah, K. S. A.

- Design and implement aesthetic enhancements for children's smiles, such as tooth-colored fillings and space maintainers, while ensuring a calming environment for anxious patients.
- Utilize digital tools to visualize treatment options and outcomes for pediatric dental procedures, helping to alleviate fears by providing clear expectations.
- Educate parents and children on maintaining their dental health and the importance of preventive care for a lasting smile, including techniques for managing anxiety related to dental visits.
- Implement conscious sedation techniques when necessary to ensure a comfortable and stress-free experience for anxious children during dental treatments.

PEDODONTICS SPECIALST | 2024- 2025

Unity Dental Clinic, Chakkarakkal, Kannur, India

- Design aesthetic enhancements for children's smiles (e.g., tooth-colored fillings).
- Conduct consultations to create personalized treatment plans for cosmetic and developmental needs.
- Use digital tools to visualize treatment options for pediatric procedures.
- Collaborate with dental labs for high-quality restorations tailored to children.
- Educate parents and children on dental health and preventive care importance.

HARD SKILLS

- Key Skills in Pediatric Dentistry: Advanced Diagnostic Skills: Proficient in diagnosing pediatric dental conditions using evaluations and imaging.
- Restorative Dentistry: Expertise in fillings, crowns, bridges, and inlays for children.
- Oral Surgery: Skilled in complex procedures like extractions and root canals, prioritizing comfort and safety.
- Prosthodontics: Ability to design and fit dental prostheses for children.
- Periodontics: Competent in diagnosing and treating gum diseases in young patients.
- Endodontics: Experienced in gentle root canal treatments for children.
- Orthodontics: Knowledgeable in treatments like removable braces and aligners for dental alignment.
- Aesthetic Dentistry: Skilled in cosmetic procedures tailored for younger patients.
- Nitrous Oxide Conscious Sedation: Specializes in safe nitrous oxide administration for a calm experience.
- Pain Management: Capable of using local anesthesia and techniques to manage pain in children.
- Infection Control: Well-versed in sterilization and infection control protocols for a safe environment.

SOFT SKILLS

- Communication: Clearly explain treatments and procedures to patients.
- Empathy: Offer compassionate care and address patient concerns.
- Attention to Detail: Perform procedures with precision and accuracy.
- Problem-Solving: Effectively handle and resolve unexpected issues.
