| • Team Management | • Research & Development |
| • Graphical Results Generation | |

Occupational Contour

Laboratory In Charge -JCI Accredited laboratory
July 2018 - Till Date

DULSCO MEDICAL CLINIC, Dubai

Responsibilities:

- Ensure effective quality control over processes and tests by ensuring that the medical testing equipment is calibrated accurately and is functioning appropriately.
- Consistently run standard and control samples to ensure an accurate result.

- Develop detailed reports on the tests conducted and presents it to the concerned practicing physician or nurse.
- Ensure that the laboratory inventory is managed efficiently and order supplies when required.
- Provide test results for effective patient diagnosis and treatment by using complex methods of sample analysis and equipment like Immunoassay, Spectrophotometer, Serological Testing, etc.
- Identify the right bacteria, fungi, parasite, and mycobacteria present in case of an infection in various types of samples like blood, smear, urine, stool, etc.
- Maintain strict confidentiality by safely securing the patient information.
- Ensure a sterile work space to minimize the risk of contamination which might yield wrong results.
- Carry out hand chemistry tests to accurately test a sample from the patient.
- Make sure that the clinic policies and regulations as well as the DHA operating standards are strictly adhered to by self and other lab personnel.
- Serve as a singular resource which will be helpful to junior lab technicians in case they have any queries or need any assistance in carrying out the tests.
- Maintain an updated knowledge in the field of Medical Testing and apply new, innovative ideas to enhance and build upon existing processes.
- Prepare the samples and specimens prior to the testing as per the established protocol.
- Develop complex graphs by performing highly accurate mathematical calculation either manually or computerized.
