PROFILE

Experienced System Administrator and Assistant Cloud Architect with a strong track record in optimizing IT infrastructure, ensuring system security, and assisting in cloud solutions. Proven expertise in on-premises and cloud environments, troubleshooting, automation, and staying current with industry trends. Effective communicator and collaborator, committed to achieving organizational goals.

WORK EXPERIENCE

System Support

Systemcent 2021-2022

- Diagnose and troubleshoot hardware, software, and network problems to ensure uninterrupted IT infrastructure.
- Install and configure servers, ensuring they meet the organization's performance and security requirements.
- Set up desktops, laptops, and other end-user devices with appropriate operating systems and software.
- Configure network printers and other peripherals for seamless functionality.
- Maintain accurate records of hardware and software configurations, changes, and maintenance activities.
- Document troubleshooting procedures and resolutions for future reference.
- Provide technical support to end-users, assisting with software installations, updates, and troubleshooting.
- Offer guidance and training to staff on IT best practices and security measures.

Assistant Cloud Architect

Stellecloud 2022-2023

- Deploy cloud infrastructure on platforms like AWS and Azure based on the organization's requirements and project specifications.
- Configure virtual private clouds (VPCs) or virtual networks to isolate an resources.
- Create and manage virtual servers and instances in the cloud, adhering to best practices and security standards.
- Provision resources as needed, scaling them up or down to meet fluctuating workloads.
- Implement auto-scaling and load balancing to ensure the infrastructure can handle varying levels of demand.
- Optimize server configurations, including CPU, memory, and storage, to achieve peak performance.
