RESPONSIBILITIES

- Examining patients in order to diagnose their medical problems and determine appropriate treatment plans.
- Plan and provide treatment in the form of medicines and therapies and refer them to specialist providers if necessary.
- Conducting physical exams and taking medical histories of patients to evaluate their current health status.
- Recommending lifestyle changes to improve health & prevent disease.
- Providing care for patients who have been hospitalized, including administering medication and ordering tests to monitor progress
- Performing administrative tasks such as scheduling appointments, processing insurance claims, and maintaining medical records
- Document treatments on digital charting software, adhering to Community Clinic's medical charting standards, including ongoing progress notes and test results.
- Work with other physicians and supportive staff as a team in order to collaborate on diagnoses and perform various medical procedures.
- Provide education to patients & families regarding medical conditions and their treatment options as well as preventative care strategies of nutrition, exercise and hygiene.
- Order laboratory tests such as white blood cell count, blood sugar and X rays and interpret test results.
