## PROFILE

As a recently graduated general dentist from Ajman University, I am eager to begin my career by utilizing my knowledge and patient-centric clinical training at a dynamic dental practice. My comprehensive education has enabled me to build a solid foundation in all aspects of general dentistry, particularly honing my skills in restorative dentistry, paediatric dentistry, and oral surgery. I am dedicated to continuous education, promoting oral health, and performing dental procedures with precision and empathy.

## WORK EXPERIENCE

### Dental Internship in Ajman University

January, 2023- January, 2024

- Conducted comprehensive dental examinations, formulated and explained different treatment options to patients, and performed dental procedures on patients of all ages.
- Performed simple and complex full oral rehabilitation cases.
- Performed root canal therapy using different rotary systems.
- Performed fixed and removable prosthodontics procedures.
- Performed lab work including impression pouring, beading and boxing of final impressions for complete dentures, creating special trays, wax rims, and mock ups.
- Performed simple and surgical extractions on patients.
- Performed different paediatric treatment including fissure sealants, restorations, stainless steel crowns, space maintainers, pulpotomies, and pulpectomies.
- Educated patients on proper oral hygiene practices to improve their dental health and prevent future problems.
- Assisted in complex surgical procedures such as alveoplasty.
- Provided emergency dental services, including treatment for dental trauma and severe toothaches.
- Collaborated with dental technicians to construct crowns, bridges, overlays, custom posts, and removable dentures for patients.
- Documented cases with pre and post-operative photographs.
- Followed up with patients after treatment.
