## Professional Summary

- Results-Driven Medical Laboratory Technologist (MLT) with a proven track record of efficiency in equipment care, operation, and training. Committed to delivering rapid and accurate analyses. Actively seeking opportunities to leverage my skills for the success of the organization.
- Proficient in handling patients and adept at performing and reporting tests in diverse laboratory settings, including biochemistry, hematology, microbiology, and blood banking.
- Hold a Bachelor of Science in Medical Laboratory Technology with a distinguished academic record, complemented by extensive hands-on experience through internships and dedicated research projects.

## Career Sketch

**Trainee - Lab Technologist at ALMAS Hospital, India | October 2022 – May 2023**

### Key responsibilities

- Contributes to patient diagnosis and treatment by conducting comprehensive laboratory tests in toxicology, biochemistry, hematology, immunology, and microbiology. Utilizes immunological and serological methods for disease identification.
- Proficient in the interpretation and reporting of results, including peripheral smear and other hematological tests.
- Executes routine and specialized biochemical tests to facilitate accurate diagnosis and support healthcare decision-making.

**Intern- Lab Technologist at KIMS ALSHIFA Hospital | October 2017 – May 2022**

### Key responsibilities

- I processed tissue specimens, engaged in histological staining techniques, and collaborated with pathologists for diagnostic insights across histopathology, hematology, and blood bank departments.
- conducted microbiological analyses, collaborated in microbial culture and sensitivity testing, and contributed to quality control measures. In the biochemistry department.
- I supported testing, analyzed patient profiles, and optimized laboratory procedures. Additionally, I supported for RT-PCR swab collections at Calicut Int'l airport during covid-19 pandemic for international arrival passengers.

## Educational Qualifications

Kerala University of Health Sciences | India

### Bachelor of Science in Medical Laboratory Technology

October 2017 – May 2022

Microbiology | Biochemistry | Histopathology | Hematology | Blood bank

### Academic PROJECTS

#### Study of serum C3 & C4 variation in renal diseases

This research project investigates the variations in serum complement components C3 and C4 in individuals with renal diseases. Through comprehensive analysis, we aim to elucidate potential correlations between altered levels of C3 and C4 and specific renal conditions. The findings could contribute valuable insights into the immunological aspects of renal diseases and aid in developing targeted diagnostic and therapeutic approaches.

## Professional Memberships

### Participating Member

Kerala Paramedical Council, India

Engaged in Medical Council activities focused on overseeing and upholding the quality of paramedical services and education. Responsible for registering qualified candidates, recognizing training institutions, identifying those with necessary infrastructure, and recommending formal recognition. Involved in academic aspects, including prescribing unified syllabi, establishing eligibility criteria for admission, and determining faculty qualifications for examination administration. Additionally, responsible for recognizing courses conducted by universities, AICTE/UGC/IM.

## Declaration

I hereby declare that all information provided in this resume is true, accurate, and complete to the best of my knowledge. I understand that any false statements or omissions may disqualify me from consideration for employment. I authorize the verification of all information listed above.
