SSLC  
83%  
2007

## EXPERIENCE

### **Advanced Clinical and Research Laboratory (ACR LAB)in association with Government Medical college kottayam, kerala.**

Medical Laboratory Technologist(Two year and three  
months Experience )MOH passed  
18/07/2016 - 24/10/2018

#### Laboratory Technician Duties and Responsibilities:-

A medical laboratory technician usually begins the day by setting up and adjusting lab equipment. Throughout the day, their tasks include collecting and receiving blood, tissue, urine, and other body fluid samples from patients. They are required to prepare these samples for routine testing through a microscope or automatic analyzer, which will give results detecting any abnormalities or diseases. The results will then be put into a computer for further analysis using graphs, charts, tables, etc. Some samples may need to be stored under controlled conditions for future use. At the end of the day, they clean up the lab equipment in preparation for the next day.

## COMPUTER SKILL

Basic Computer knowledge (MS word, Excel)

## PERSONAL STRENGTHS
